About me

I am an engineer. I have experience working on Frontend and Backend development using Javascript programming language. I am looking for a Frontend or Backend job working with JS framework (ReactJS, NestJS) and much more. I have a programming orientation for Frontend ReactJS/NextJS and Backend NodeJS. I have learned and made different kinds of projects, as shown below. Moreover, I am fluent in English and have good communication skills for interaction and discussions. I can easily comprehend complex technical documentation owing to my ability to read and understand English proficiently. Beyond technical skills, I bring strong communication and problem-solving abilities.

Education

VNUHCM - International University

BioMedical Engineering

Cybersoft Academy

Front-end Developer

Cybersoft Academy

Backend NodeJS Developer

Experiences

Projects/Task

Cinema management

5/2023 - 6/2023

Purpose: Design and build a friendly web for cinema management.

- Design an easy-to-use website for cinema management by **using Figma and Photoshop**.
- **Login/Register/Logout feature** for user and admin page for manager.
- Built a movie ticketing website **using ReactJS** that allows users to browse movie showtimes and purchase tickets.
- Implemented a **responsive design** to provide optimal viewing and interaction across devices.
- Fetch movie data including titles, posters, and showtimes from a third-party **API using Axios**.
- Users can select movies, theaters, and show dates/times before adding tickets to their cart.
- Implemented admin interfaces for managing movie catalogs, theaters, and processing orders.
- Leveraged React concepts like **hooks, context**, and custom components for modularity and reusability.
- **Optimized data fetching and rendering** for high performance on the client side.
- **Deployed the application** on a cloud platform for public access.
- Incorporated responsive design patterns and accessibility standards.
- **Performed testing and debugging** to ensure core functionality and payment workflows.
- Manage projects using the version control system **Git**.
- Using **ReactJS library, React Router V6, React hooks, Redux Toolkit, Axios, React-hook-form, SASS,...**
- Source/demo: [Cinema Management](#)

Purpose: Design and build a friendly web for online education.

- **Login/Register/Logout** Feature, an admin page.
- Built an online course registration website using **ReactJS** and **integrated other React libraries**.M
- Leveraged **React Hooks** like **useState**, and **useEffect** to manage state and interact with APIs.M
- Fetched data for the application from backend APIs through the **Axios** library.
- Developed user interfaces on React with **components**, **routing**, and **proper folder structure**.M
- Used Context API and custom hooks to manage **global state** and **pass data** using props.
- Tested and optimized the interfaces, and performance of the application.
- The website allows users to **search**, **filter**, and **sign up** for online courses.
- Administrators can **add**, **edit**, **delete courses**, and **manage** students.
- Using **ReactJS** library, **Vite**, **Redux Toolkit**, **React-hook-form**, **SCSS**, **Axios**, **ES6**, **Algorithms**, **Git**,...
- Source/Demo: [Learning Platform](#)

Projects/Task

Cinema Backend System

1/2024 - 2/2024

Purpose: Build a backend system for cinema management.

- Built a backend for a movie ticketing website using **Node.js runtime environment** and the **NestJS** framework.M
- **Designed RESTful APIs** for managing theaters, showtimes, and ticket booking **endpoints**.
- Used **Swagger to document APIs**, create documentation, and test interfaces.
- Integrated a **MySQL database** to store and retrieve movie and theater data.
- Employed **Prisma as the ORM** layer instead of direct queries to MySQL.
- **JWT** applied for accessing the backend system.
- Connected APIs to the database through **Prisma Client**.
- **Tested** request handling and database interactions using **Postman** tool.
- **Deployed** the backend server to serve the front end efficiently.
- Using **NestJS**, **MySQL**, **Prisma ORM**, **JWT**, **bcrypt**, **muler**, **swagger**, **Git**,...
- Source/Demo: [Cinema Backend System](#)

Others experiences

Technician-Xiaomi Corporation

1/2022 - 11/2022

- Technical support for customers relating several devices for home and medical application.
- Communicating with foreign customer for sale.
- Supporting IT team in customer data processing.

Prizes and Awards

Partial Scholarship at International University VNU-HCMC

Top 10 IU Innovation

Skills

Frontend

- HTML5, CSS3/SASS, BEM
- Javascript, jQuery, ES6
- ReactJS, Restful API, Axios, React Router V6, React Hooks, Redux/Redux-toolkit, React-hook-form,...
- Bootstrap, Tailwind CSS, AntDesign, MUI,...
- Responsive
- Web accessibility, cross-browser compatibility

Other skills

- Able to use computers effectively and to detect and fix computer errors.
- Able to use Word, Excel, and PowerPoint effectively.
- Work independently & teamwork.
- Research, self-study.
- Responsibility, proactive
- Hungry for learning and practicing.

Backend

- ExpressJS, NestJS, GraphQL, RESTful API
- Docker, Postman
- SocketIO
- MySQL Database, Sequelize ORM, Prisma ORM

Language

- Able to use English for communication and reading technical documents.
- IELTS Certificate 6.0

Design

- Able to use Adobe software: Adobe AE, Photoshop, Illustration, Balsamiq WireFrames,...
