📍 55/53 Tân Lập, Đông Hoà, Tp. Dĩ An, tỉnh Bình Dương 📞 0355 437 766

### About me

I have experience working on UI/Markup Frontend development using Javascript and NodeJS backend. I am looking for a Frontend or Backend job working with JS framework (ReactJS, NestJS) and much more.

I have a programming orientation for Frontend ReactJS/NextJS and Backend NodeJS. I have learned and made different kinds of projects, as shown below. I hope to be able to work and develop myself to become a Junior Frontend/Backend Developer soon and pursue a career in other JS Frameworks (NextJS, React Native, VueJS).

### Education

VNUHCM - International University	Engineering	2016 - 2022
Cybersoft Academy	Front-end Developer	2022 - 2023
Cybersoft Academy	Backend NodeJS Developer	2022 - 2023

### Experiences

Projects/Task	Cinema management
<p>Purpose: Design and build a friendly web for cinema management.</p> <ul style="list-style-type: none"><li>-Design an easy-to-use website for cinema management by using Figma and Photoshop.</li><li>-Login/Register/Logout feature for user and admin page for manager.</li><li>-Built a movie ticketing website using ReactJS that allows users to browse movie showtimes and purchase tickets.</li><li>-Implemented a responsive design to provide optimal viewing and interaction across devices.</li><li>-Fetch movie data including titles, posters, and showtimes from a third-party API using Axios.</li><li>-Users can select movies, theaters, and show dates/times before adding tickets to their cart.</li><li>-Implemented admin interfaces for managing movie catalogs, theaters, and processing orders.</li><li>-Leveraged React concepts like hooks, context, and custom components for modularity and reusability.</li><li>-Optimized data fetching and rendering for high performance on the client side.</li><li>-Deployed the application on a cloud platform for public access.</li><li>-Incorporated responsive design patterns and accessibility standards.</li><li>-Performed testing and debugging to ensure core functionality and payment workflows.</li><li>-Using ReactJS library, React Router V6, React hooks, Axios, React-hook-form, SASS/MUI...</li></ul>	

Purpose: Design and build a friendly web for online education.

- Login/Register/Logout Feature, an admin page.
- Built an online course registration website using ReactJS and integrated other React libraries.
- Leveraged React Hooks like useState, and useEffect to manage state and interact with APIs.
- Fetched data for the application from backend APIs through the Axios library.
- Developed user interfaces on React with components, routing, and proper folder structure.
- Implemented an admin dashboard using React for content management.
- Used Context API and custom hooks to manage global state and pass data.
- Tested and optimized the interfaces, and performance of the application.
- The website allows users to search, filter, and sign up for online courses.
- Administrators can add, edit, delete courses, manage students.

## Projects/Task

## Cinema Backend System

Purpose: Build a backend system for cinema management.

- Built a backend for a movie ticketing website using Node.js and the NestJS framework.
- Leveraged TypeScript for code maintainability and readability.
- Designed REST APIs for managing theaters, showtimes, ticket booking endpoints.
- Used Swagger to document APIs, create documentation, and test interfaces.
- Integrated a MySQL database to store and retrieve movie and theater data.
- Employed Prisma as the ORM layer instead of direct queries to MySQL.
- Connected APIs to the database through Prisma Client.
- Storing user data inside system.
- Tested request handling and database interactions.
- Deployed the backend server to serve the frontend efficiently.
- Leveraged NestJS features like dependency injection, modules.

## Others experiences

## Technician-Xiaomi store

7/2019 - 3/2020

- Technial support for customers.
- Sale assistant

## Prizes and Awards

## Partial Scholarship at International University VNU-HCM

## Top 10 IU Innovation

## Skills

### Frontend

- HTML5,CSS3/SASS,BEM
- Javascript, jQuery
- ReactJS: React Router V6, React Hooks, Redux/Redux-toolkit
- REST API, Axios
- Bootstrap, Tailwind CSS, AntDesign, MUI,...
- Responsive
- Web accessibility, cross-browser compatibility

### Backend

- ExpressJS
- NestJS
- Socket
- MySQL Database, Sequelize, Prisma

**Microsoft Office**

Able to use Word, Excel, Powerpoint effectively.

**Other skills**

- Able to use computers effectively and to detect and fix computer errors.
- Work independently & teamwork.
- Research, self-study.
- Responsibility, proactive
- Hungry for learning and practicing.

**Design**

Able to use Adobe software: Adobe AE, Photoshop, Illustration

**Language**

Able to use English for communication and reading material. IELTS certificate.
